

## ABSTRACT OF THE DISCLOSURE

A print system comprises a digital camera and a printer. The digital camera photographs a subject and produces image data. Print data including print-setting data and printing data is produced from the image data and print setting information. The digital camera is provided with a high-speed radio I/F and a low-speed radio I/F. The printer is also provided with a high-speed radio I/F and a low-speed radio I/F. The setting data is transferred from the digital camera to the printer through the low-speed radio I/F. The printing data is transferred from the digital camera to the printer through the high-speed radio I/F. The printer prints an image of the subject on the basis of the print data transferred from the digital camera to the printer.
